SKILLS

- Python
- Node.js
- API Development
- Angular
- React
- Architecture and Design
- Agile Methodology
- Relational Database (PostgreSQL, MySQL, MSSQL)
- NoSQL Database (MongoDB)
- Machine Learning (TF, PyTorch, Transformers)
- Cloud Technologies (AWS, GCP, Digital Ocean)
- DevOps (Kubernetes, GitHub Actions)

LANGUAGES

- Spanish
- English

PROFILE

Software Engineer with over 8 years of hands-on experience, specializing in designing and developing resilient back-end systems and user-friendly front-end applications. Proven track record of leading high-impact integrations, architecting scalable solutions, and delivering performance optimizations with measurable results. Within the back-end realm, I have focused on integrating innovative Machine Learning (ML) solutions for advanced document processing and chatbot development.

EMPLOYMENT HISTORY

Senior Software Engineer | LCvista, United States
May 2024 - Present

- Spearheaded the architecture design and end-to-end implementation of a LinkedIn Learning integration, a highly requested LMS feature that automatically syncs course catalogs and tracks completions via xAPI webhooks.
- Migrated a recently acquired web application from PHP to Python. This involved a side-by-side migration approach, where the new Python application ran concurrently, gradually receiving traffic as new components were deployed.
- Implemented a smart report generation system that detects oversized reports, offloads processing to background workers, and delivers results via email .
- Provided support for DevOps tasks, effectively delivering robust infrastructure for the company's core product and the migration project.

Lead Software Engineer | Tagshelf, Santo Domingo
June 2021 - May 2024

- Implemented an innovative document processing workflow for vaccine-related documents in a national-level government project during the COVID-19 pandemic, achieving a significant social impact on public healthcare.
- Slashed the human-power needed for processing physical documents by an impressive 40% for a leading insurance company. This transformation liberated their team from the burdensome task of data entry, empowering them to concentrate on delivering their core value proposition with heightened focus and efficiency.
- Mentored a team of newly graduated engineers, guiding them to develop skills necessary for high proficiency in a dynamic and rapidly changing business environment.
- Facilitated direct customer interactions, effectively discerning client needs and translating them into detailed project requirements and technical tasks.

Software Engineer | Tagshelf, Santo Domingo
February 2019 - June 2021

- Elevated the company's position in the chatbot and omni-channel market by introducing an innovative solution during the initial surge of chatbots and automation in the customer support landscape.
- Accelerated the time-to-market by optimizing the development process through automated deployments, containerization and the implementation of Software Development Kits (SDKs).

Junior Developer and Consultant | ITSS, Santo Domingo
January 2018 - February 2019

- Managed to reduce the response time of support tickets by up to 20%, even as a junior consultant for proprietary software.
- Collaborated with a global team across multiple time zones to ensure synchronized interactions with a local bank, thereby improving customer relations.

Webmaster | Sabores Dominicanos, Santo Domingo
November 2015 - May 2016

- Successfully developed and delivered a comprehensive website with Content Management System (CMS) capabilities for a non-profit organization dedicated to promoting national gastronomy.

CERTIFICATIONS

AWS Certified Machine Learning Engineer – Associate
December 2025 - December 2028

AWS Certified AI Practitioner
September 2025 - September 2028

EDUCATION

Bachelor of Engineering | UNIBE, Santo Domingo
September 2014 - September 2018

- Graduated with the highest honors, showcasing exceptional academic achievements and a dedication to excellence in the field of Computer Science.
- Actively engaged with the university in various internal projects, demonstrating practical application of academic knowledge in real-world scenarios.
